Chicago, IL

EXPERIENCE

IntelPeer · Senior UX Designer, AI Product

Dec 2024 – Present

- **Agent-building platform.** Designed core workflows for an enterprise AI agent platform (agent setup, MCP tools, session review), prototyped in production code with progressive disclosure to tame complexity.
- **Human-in-the-loop development.** Led UX for an agentic software development process (a “software factory”), defining where people review, approve and redirect AI-generated work.
- **Guided agent creation.** Turned an agent-builder prototype into a guided flow where carefully structured questions generate a working starting agent. Designed the generation states and engineering specs.
- **Platform decisions.** Led the UX perspective in buy-vs-build decisions for agent observability, BI and data visualization, and speech (TTS/ASR) pipelines.
- **Testing and evaluation.** Built a Next.js testing app on Azure so non-engineering teams can run LangGraph agents and inspect every step, and designed the test suites, policies and run history around it.
- **Embedded AI assistant.** Designed safeguards and UX for an in-product assistant that helps users create and edit agents: visible context, conversation rewind and approval before changes take effect.
- **Design systems.** Rolled out a rebrand and dark mode in code, running old and new brands side by side while merging duplicate components and standardizing design tokens.
- **Agent optimization.** Created model right-sizing pipeline to migrate production agents off heavy models, while keeping users aware of specific necessary tradeoff decisions. Cut model spend by more than 50%.

Interactions · Conversation Designer

Oct 2019 – Dec 2024

- Designed and built conversation flows for enterprise clients’ virtual assistants, from requirements to launch.
- Represented design on a dedicated tools team, working with engineers to improve internal authoring tools.
- Helped establish the design team’s reusable conversation patterns, components and onboarding material.

Fuzzy Math · UX Design Intern

Jun – Aug 2019

Turned survey and stakeholder research into website wireframes, final comps and strategy insights.

Uptake · Interaction Designer

Mar – May 2019

Prototyped predictive-model workflows with engineers and data scientists; co-designed dashboards for three roles.

Groupon · UX Research Intern

May – Aug 2018

Recruited participants, ran eight discovery and usability sessions and presented findings to product teams.

SKILLS & TOOLS

Design: Interaction and conversation design, user research, prototyping, design systems · Figma, Paper, Adobe CC
Code and AI: React, Next.js, shadcn/ui, Claude Code, Codex, Cursor, ElevenLabs
Ship and collaborate: Vercel, Azure, GitLab, Jira, Notion

EDUCATION

Columbia College Chicago · Bachelor’s, Interaction Design · UX minor · Dec 2018

College of DuPage · Associate’s, Graphic Design · UX concentration · May 2017
